

Go from Reactive to Proactive

Run a better plant with Industry 4.0 applications implemented and supported by Hargrove. Our Digitalization Team will work with you to determine which digital technologies will have the greatest long-term value for your operation's efficiency and profitability to create a modern, sustainable facility. We leverage artificial intelligence (AI) and machine learning technologies to improve communication between platforms, gain better visibility into your problems, and improve your asset reliability & maintenance strategies.

Digitalization Capabilities

Our Digitalization Team supports our clients with the following solutions:

- Process Networking and IIoT Connectivity
- Process Data Historians
- On-Premise and Cloud Data Aggregation
- Industrial AI and Machine Learning Applications
- ERP, CMMS, LIMS, and Process Historian Convergence
- MES Integration
- Paper to Glass Transitions
- Predictive Reliability
- Quality Improvement
- RAM Modeling for Design and Operations Optimization
- Demand Forecasting
- Digital Twins

Platforms & Partners

Project Experience

- Multi-site digitalization rollout with an advanced materials supplier
- Long-term PI support for an energy solutions provider
- Long-term IP.21 MES support for a chemicals manufacturer
